WHY USE HAND-HELD METERS?

Take spot measurements across various locations to get a clear understanding of water conditions, enabling you to make quick adjustments to water quality.

GAIN ACCURATE RESULTS

- Our hand-held meters make monitoring of the parameters quick, easy and accessible, right at your hand.
- The Polaris C is designed to be used in aquaculture, research, wastewater treatment and other industries that need to have trustworthy results right away.
- Hand-held meters are waterproof, sturdy and can withstand the tough conditions in everyday use. They are built to last.

TAGS

Identify fish tanks or users with unique tags on your Polaris C. Easily store or upload saved data to Cobália.

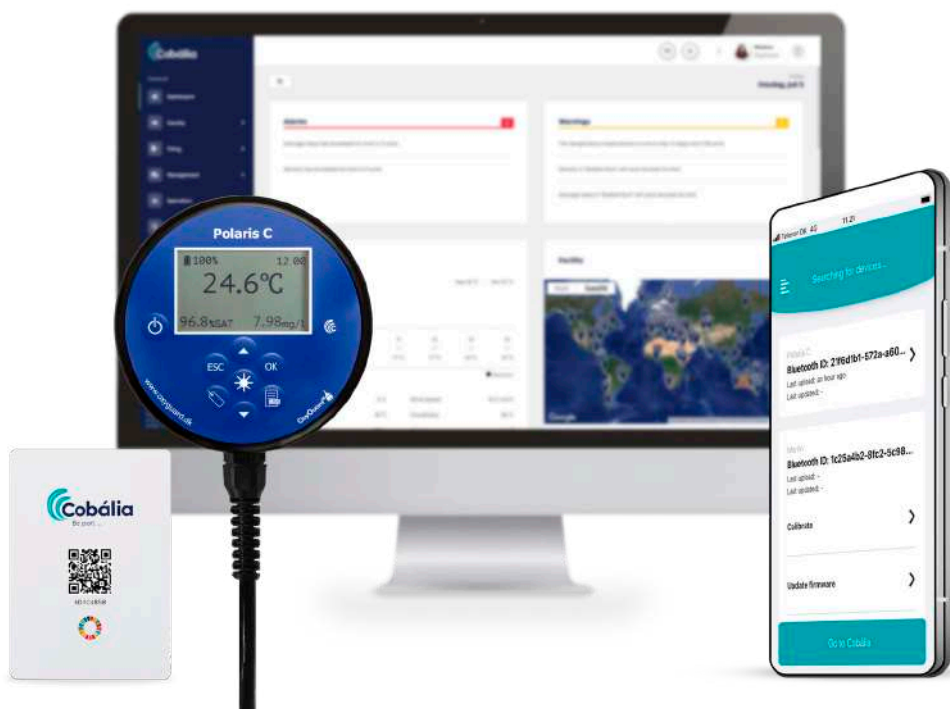

COBÁLIA COMPATIBLE

All Polaris C devices are integrated with our digital farm management platform, Cobália. Cobália Basic is available free of charge, providing access to [software updates](#), [live data](#), and [more](#).

EASY TRANSFER

You can transfer data from your
Polaris C to Cobália via Cobalia Sync App.

Download Cobália Sync app

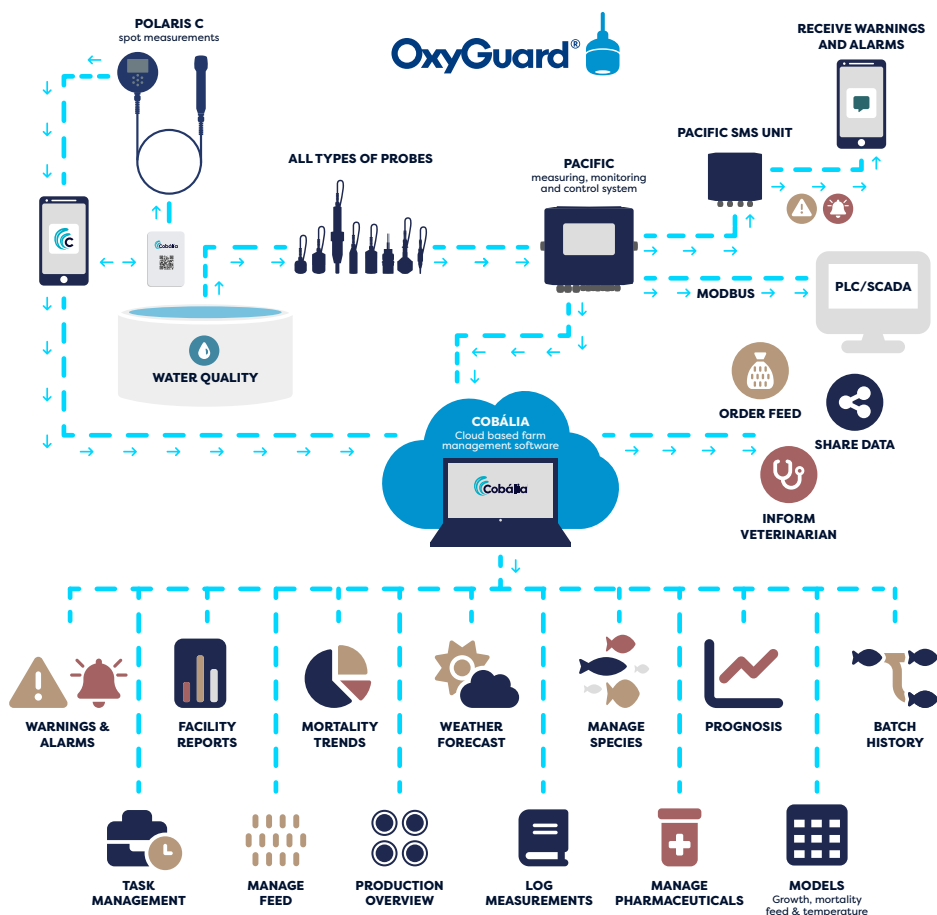

To see and upload measurements
from your smartphone!

Available in Google Play & App store

LET'S BUILD CLEVER FARMS

Optimize your farm operations by integrating everything into Cobália to create your digital farm.
